

## **Gold Standard Anaesthesia**

## **Another quality service from Ash Veterinary Surgery**

You can be assured that we do all we can to deliver safe and pain free surgery for your pet.

### **We achieve this:**

#### **Before surgery by:**

- ✓ Giving a full health check and the necessary tests to make sure your pet is fit enough for anaesthetic
- ✓ Relaxing your pet using a premed sedative. This includes a painkiller
- ✓ Giving the quickest and safest injection to start the anaesthetic.
- ✓ Adding an additional painkiller.

#### **During surgery by:**

- ✓ Continuing anaesthesia with a gas anaesthetic. This combines a painkiller with the very latest veterinary anaesthetic.

#### **After surgery by:**

- ✓ Giving a further pain killer injection.
- ✓ Continuing to monitor your pet through the recovery phase until fully awake

#### **From start to finish your pet:**

- ✓ Will be closely monitored by our fully trained and qualified Veterinary Nurses
- ✓ Will be monitored using the latest electronic equipment.

#### **For further piece of mind:**

- ✓ Pre operative blood screening can be performed.
- ✓ Intravenous fluids can be given to aid recovery

***Our Gold service ensures your pet will wake up more quickly, be more alert and pain free.***

***At Ash Veterinary Surgery we don't compromise.***
